Response to Amendment

1. The amendments filed 11/28/2003 have been entered.

Drawings

2. The drawings were received on 11/28/2003. These drawings are approved.

Claim Objections

3. Claim 21 is objected to because of the following informalities: the claim contains the limitation that "a₃" is an empirical parameter, but the expression does not contain such an element. Appropriate correction is required.
4. Claim 22 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 21. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).
5. Applicant is advised that should claim 21 be found allowable, claim 21 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 21, 22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 14, 15 of U.S. Patent No. 6,376,843. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between the claims is the parameters in the expression for the spatial brightness profile. The current application discloses the expression: $dV / dx = A_0x(1 + a_1x + a_2x^2)$ which, just by simply opening the paranthesis, can be written as $dV / dx = A_0x + A_0a_1x^2 + A_0a_2x^3$; since A_0 , a_1 , and a_2 are all parameters with no specific values disclosed, the above expression can be written as $dV / dx = a_1 x + a_2 x^2 + a_3 x^3$ by simply renaming the parameters. Thus, the expression disclosed in the present application is mathematically and empirically the same as the expression disclosed in the parent patent, for renaming constants and parameters in an expression does not change the scope of the expression and claim.

Response to Arguments

8. Applicant's arguments filed 11/28/2003 have been fully considered but they are not persuasive. The pertinent arguments presented by the Applicant regarding these claims is that the present claim contains limitations, such as the spatial brightness expression, that is not contained in the parent claims, and that the Examiner did not specify how the parameters can be rearranged to obtain the same expression as in the parent patent. These arguments are not persuasive for the reasons indicated in detail in the rejection paragraph.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
